## FOREWORD

---

SAN FRANCISCO is the premier American port of the Pacific. It has the harbor, the transportation and banking facilities, the markets, the stocks, and the reliable firms engaged in Foreign Trade which combine to form the strong foundation on which her supremacy is based. Her growth, at times approaching the phenomenal, has been a continuous, healthy one, becoming stronger each year until she now stands as one of the leading ports of the World.

To aid further those merchants in foreign countries who already are aware of the advantages to be had in dealing with San Francisco, and to answer the many others who have inquired for information regarding the activities of the Importers and Exporters in this city, this Directory—*The Foreign Traders of San Francisco*—has been published. In it will be found over 20,000 listings, by which 536 firms and individuals engaged in Foreign Trade are classified according to name, address, cable address, business, telephone number, commodities dealt in, countries imported from, and countries exported to.

To secure this wealth of information, over 800 questionnaires were mailed and followed by personal interviews; 15,000 letters of notification were posted; 3,500 post cards were sent out for the purpose of verifying information already received and requesting additional data. The result, *The Foreign Trade Bureau of the San Francisco Chamber of Commerce* believes, is one of the most complete directories of its kind ever published and, although it obviously cannot assume any responsibility for the veracity of the listings, the result of the many check-ups made during the compilation of the book gives the Bureau the fullest confidence in recommending it to those for whose benefit it has been published—*The Foreign Traders of the World*.

# PORT OF SAN FRANCISCO CALIFORNIA

## Headquarters of Customs District of San Francisco—No. 28 San Francisco Harbor

The Bay of San Francisco is the largest and one of the finest land-locked harbors in the world. It is sixty-five miles long and from four to ten miles wide. It contains four hundred and fifty square miles of area with seventy-nine miles of safe anchorage eighteen to eighty feet in depth.

The outlet or entrance, "The Golden Gate," is one and one-eighth miles wide, with a depth of sixty-three fathoms and a minimum depth in the channel sufficient to accommodate the largest vessels afloat at any hour of the twenty-four. It is a satisfaction to know that no matter how great the depth of the ship of the future, it will always be able to enter the port of San Francisco in safety. Very few of the ports of the world can boast of such deep, wide channels at their entrance.

The average rise and fall of the tide is about four feet while the extreme, which occurs about two or three times a year rarely exceeds, eight feet. The bay proper has a total water frontage of nearly one hundred and fifty-five miles (excluding the shores of the arms thereof, such as Oakland harbor).

Important water terminals are located on four sections of the bay shore. These developed frontages are distributed as follows: San Francisco pier and wharf facilities extend approximately five miles. Along the water front, at the pier head line, the depth of water ranges from forty to eighty feet.

The Oakland bay frontage is over two miles, exclusive of Oakland Harbor which is highly developed along the Oakland and Alameda shores. The shore from Richmond to Point San Pablo is four miles in extent.

Marin County's Sausalito-Tiburon frontage is about two miles in length.

The remaining frontage has either very broad tidal flats and wide fore shores, or rugged shores rising abruptly from the water's edge. Much is being accomplished in the conversion of the tidal flats into deep water frontages.

**PILOTAGE.**—Pilotage in and out of San Francisco Harbor is under the jurisdiction of a State Board of Pilot Commissioners, appointed by the Governor, which body establishes the rules and regulations regarding the conduct of all pilots, as well as licensing and commissioning pilots. Pilotage in and out of San Francisco harbor is generally compulsory, except as follows:

All vessels sailing under an enrollment, and licensed and engaged in the coasting trade between the Port of San Francisco and any other port of the United States are exempt from pilotage unless a pilot be actually employed.

All foreign vessels and all vessels from a foreign port or bound thereto, and all vessels sailing under a register from the port of San Francisco and any other port of the United States, are liable for pilotage.

**RATES OF PILOTAGE.**—Rates of pilotage are fixed by state law as follows:

All vessels under 500 tons, \$2.00 per draught foot.

All vessels over 500 tons, \$2.00 per draught foot, and 2 cents per ton for each and every ton registered measurement; and every vessel spoken inward and outward bound, except as hereinafter provided, shall pay the said rates.

A vessel is spoken by day by a pilot boat displaying a union jack, or by night displaying a torch or flare-up within a distance of three miles of the vessel. In all cases where inward bound vessels are not spoken until inside of the bar the rates of pilotage herein provided shall be reduced 50%. Vessels engaged in the whaling or fishing trades shall be exempt from all pilotage except where a pilot is actually employed. In the event a vessel not carrying cargo to the Port of San Francisco, nor seeking any thereat, is compelled to enter said port solely by reason of her being in distress or requiring repairs, provisions or fuel, the rates into said harbor shall be as follows:

All vessels under 500 tons, \$1.00 per draught foot.

All vessels over 500 tons, \$1.00 per draught foot and one cent per ton for each and every ton registered measurement; and every vessel spoken inward bound shall pay the said rates. There shall be no reduction of rates of pilotage to vessels in distress where the vessel is spoken inside the bar. In the event that the vessel shall leave the Port of San Francisco without carrying any cargo therefrom, she shall pay the last-mentioned rates of pilotage out of the Harbor of San Francisco.

**TOWAGE.**—Towage in San Francisco is conducted by private tow boat companies and the charges for the services performed vary according to the condition under which the contract is to be carried out, but are generally assessed within the range of the following schedule:

## SAILING VESSELS

The cost of towage from sea (lightship) to anchorage varies with distance and size of vessel, ranging from \$100.00 to \$300.00 For moving a vessel of 2,000 tons net register in the harbor the charges are approximately:

Docking, city front.....	\$75.00
Stream to Port Costa or Port Costa to stream.....	175.00
Stream to sea (lightship).....	200.00

Fore and aft rigged vessels pay, according to size, from \$20.00 to \$40.00 for docking, and from \$75.00 to \$125.00 for towing to sea.

## STEAM AND MOTOR SHIPS

(Charges based on net tonnage vessel)

1. Services to tug assisting to dock on city front.....	\$ 25.00 to \$ 40.00
2. Towing (without power) from dock to dock between Meiggs' Wharf to Mission Rock.....	75.00 to 150.00
3. Services to tug assisting to Union Iron Works or Hunter's Point...	50.00 to 70.00
4. Towing (without power) to Union Iron Works or Hunter's Point...	100.00 to 250.00
5. Services to tug assisting to Oakland Harbor (east of Bridge at Webster Street).....	50.00 to 80.00
6. Towing (without power) to Oakland Harbor.....	100.00 to 250.00

**LIGHTERAGE.**—Lighterage in the Port of San Francisco is entirely in the hands of private companies and the charges are made according to the service performed, and while the conditions are widely different in every case, the rental of lighters is according to a common schedule based upon the capacity of the float and the time for which it is to be used.

## DOCKAGE, TOLLS, WHARF RENTALS, DEMURRAGE AND STORAGE

**DOCKAGE.**—The charge assessed against a vessel for berthing at a wharf, pier or seawall structure or coming within slip, channel, basin or canal.

**TOLLS.**—The charge for cargo conveyed on, over or through any state structure, both inward and outward, or loaded or discharged while ship is moored in any slip, basin, channel or canal.

**WHARF RENTALS.**—The charge per square foot for wharf area assigned, dependent upon class of structure used.

**WHARF DEMURRAGE AND WHARF STORAGE.**—The charge assessed against merchandise that remains on wharf or pier beyond the free period.

**DOCKAGE CHARGES.**—Free dockage is accorded vessels at own assigned berth when loading or discharging a minimum of 500 tons daily. All other vessels pay full dockage rates. However, sailing vessels, cargo of lumber, or in instances where it is physically impossible to discharge 500 tons daily, the minimum will be at the option of the Board. It is intended that no vessel shall be unduly penalized, but that there shall be no unwarranted delay.

Half dockage rate is one cent per ton per day of twenty-four hours, or part thereof, for the first 200 net registered tonnage, or underdeck tonnage measurement, and three-eighths of a cent for each additional ton.

Half rates are charged to vessels in foreign and offshore trade:

1. When failing to load or discharge daily minimum as provided for under free dockage.
2. While lying idle at berth.
3. When undergoing repairs at berth.
4. When docking solely for bunkering coal.

To vessels in coastwise or inland waterway trade:

1. With no cargo on board, docking at wharf while loading cargo.
2. With no cargo on board, docking at wharf while receiving passengers or receiving stores, supplies, or fuel for such vessel.
3. With no cargo on board, while lying idle at wharf.
4. With cargo on board docking at wharf while taking on an amount of cargo equal to one-fifth of net registered tonnage, exclusive of stores, supplies, or fuel for such vessel.
5. While receiving or discharging ballast or receiving stiffening.
6. While occupying outside berths and discharging, loading or lying idle.

*Note.*—Vessels engaged in towing, and vessels not engaged in carrying freight and passengers, not entitled to half rates.

Full dockage rate is two (2) cents per ton per day of twenty-four hours, or part thereof, for the first 200 net registered tonnage, or underdeck tonnage measurement and three-fourths of a cent for each additional ton.

Full rates are charged to vessels in coastwise or inland waterway trade other than lighters:

1. With cargo on board docking at wharf while discharging cargo.
2. With cargo on board docking at wharf while discharging or taking on passengers and baggage.
3. With cargo on board docking at wharf taking on stores, supplies or fuel for such vessel.
4. With cargo on board docking at wharf while lying idle.
5. With no cargo on board docking at wharf while discharging passengers and baggage.
6. That are engaged in towing.
7. That are not engaged in carrying freight and passengers.

**TOLL CHARGES.**—The tolls charged on goods moving over the wharves of San Francisco vary with the particular item in question, but these charges are based according to a regularly-published tariff of the Board of State Harbor Commissioners. The comprehensiveness makes it impracticable to present herein the complete schedule, but specific information regarding toll charges on any or all commodities may be had and copy of tariff secured by addressing the Traffic Manager, Board of State Harbor Commissioners, San Francisco, California.

**RENTAL CHARGES.**—Free rental is accorded vessels engaged in foreign or offshore trade for temporary assignment.

Vessels engaged in foreign or offshore trade desiring permanent assignment may obtain the same for \$0.006 per square foot per month or part thereof.

Vessels engaged in coastwise or inland waterway trade may obtain permanent assignment upon the payment of a rental of \$0.012 per square foot per month on wharves.

**DEMURRAGE CHARGES.**—In the regular dispatch in the loading or unloading of a vessel at San Francisco demurrage charges need hardly be considered, for the demurrage is assessed as a penalty for the use of wharf space for storage purposes.

Vessels engaged in foreign and offshore trade are allowed ten days' free time, exclusive of Sundays and legal holidays, for assembling cargo upon space assigned.

Vessels engaged in coastwise and inland waterway trade are allowed five days' free time exclusive of Sundays and legal holidays for the assembling of cargo upon space assigned.

Exclusive of Sundays and legal holidays, coastwise and inland-waterway cargo remaining on space assigned longer than five days and foreign and offshore cargo remaining on space assigned longer than ten days after complete discharge of vessel delivering same, shall thereafter (Sundays and holidays not excepted) be assessed a wharf demurrage charge of 25 cents per ton weight or measurement for the first five days or part thereof and 50 cents per ton for each succeeding five days or part thereof. Lumber may be charged per 1,000 feet board measure.

Exception. Grain, flour, millstuffs, onions, potatoes, beans and seeds may, when necessary, remain in Piers Nos. 27 and 25 until 5 o'clock p. m. on the third day after discharge free of demurrage charge; for the next seven days or any part thereof, Sundays and holidays excepted, there shall be a demurrage charge of 5 cents per ton; for each additional day of twenty-four hours, or fraction thereof, thereafter, the demurrage charge shall be 5 cents per ton; provided, that where any owner or consignee fails or refuses to pay, on demand, bills rendered for demurrage or refuses to comply with other rules and regulations of the Board of State Harbor Commissioners, the provisions in the preceding paragraph of this item shall apply and become immediately effective as to such owner or consignee; provided, further, that in the event of congestion, the Chief Wharfinger is empowered at any time to cause the removal of any cargo or portion thereof, at the expense of the owner or consignee, irrespective of the free period.

The term "grain" is intended to and does include wheat, barley, and rye; the term "flour" includes only bran, middlings, shorts and ground feed.

**STEVEDORING.**—Stevedoring in the Port of San Francisco is contracted for by private individuals or firms. However, many steamship companies maintain their own organizations.

Competition in stevedoring is keen and rates are subject to change without notice; therefore, no figures are quoted herein.

It is the custom in the Port of San Francisco for the ship or steamship company to pay the cost of stevedoring or handling from the hold of the ship to the pile on the wharf (interior of the shed) and for the railway company to pay the stevedoring charges from the pile on the wharf to the car or vice versa on line hauls. On less than line hauls, and on local business, the consignee pays only the cost of unloading or loading cars or draying charges.

Whether or not any form of equipment is used, the actual handling of cargo is not assumed by the Board; this work is left to each carrier or individual either to be performed by them at cost to themselves, or subject to contract arrangements between such interested carriers or individuals and competing labor. There are a number of bona fide stevedoring companies, well trained and equipped, competing for the business. The result proves that cost of handling cargo at San Francisco is considerably less than handling charges exacted at other ports.

### Fine Garters Made in San Francisco

Sidley Garters are made with the best quality elastic and other materials. They are sold by us at reasonable prices. Our Factory is located in San Francisco. This saves time and transportation expense to our customers in the Pacific ports of the World, avoiding shipment across the American continent.

A sample line, consisting of nine SIDLEY Garters in a substantial book, will be shipped upon receipt of Two (\$2.00) dollars. This amount will be placed to your credit when you send us an order.

Sidley Garters are guaranteed in quality, and will give the best satisfaction.

Our Goods packed securely for foreign shipment. References: The United Bank and Trust Company.

# "CATERPILLAR" TRACTORS

For ROAD WORK  
FREIGHTING  
FARM POWER  
LOGGING, ETC.

So widely used for road building and maintenance in the United States that it is known as "The Nation's Road-Maker;" so efficient in freighting that it is a veritable cross-country locomotive; so dependable and economical in agriculture that it has enabled thousands of farmers to reduce their power costs—the "Caterpillar" Tractor is the logical choice for every kind and condition of tractive work.

It has proved its efficiency in the extreme cold of Alaska and in the heat of the Tropics. It travels over snow and ice, through mud and sand. It is backed by years of experience and a record of field performance equalled by no other tractor.

Whatever your power problem, it will pay you to investigate the "Caterpillar" Tractor. Write for complete catalog and the name of the nearest Holt representative.

## FOR TOUGH JOBS *Anywhere*

ON sugar plantations in Cuba, in jungle forests near Singapore and so on over the world where sturdy, reliable power units are wanted for heavy work, Best Tractors are giving the satisfactory results expected of them.

Best "Thirties" and "Sixties" know no limitation of seasons. Throughout the year, there is work for them to do; pioneer work opening up new country, maintenance work on metropolitan boulevards and unsung, routine grind on farms, in lumber camps and on construction jobs.

Shrewd buyers investigate thoroughly. This company welcomes investigation with full confidence in its machines. A catalog and complete information on Best Tracklayer Tractors will be sent on request.

## *"The Sunshine Belt"* VIA HONOLULU

On board one of the palatial, new American-built passenger vessels; 535 feet long and 21,167 displacement tons. Staterooms furnished and equipped like a room at home, with private baths or showers, electric reading lamps and fans, dressers and closets. Beautiful social rooms and long, broad decks for sports and exercise; in fact everything which goes to uphold the American standard of comfort and convenience in ocean travel.

# An Old Name on a New Line

FROM California to the Orient and westward round the world on the new Dollar Steamships.

The Dollar name of world-wide fame is again to the fore.

Seven luxurious "President" vessels are now owned and operated by the Dollar Steamship line. Fortnightly sailings westward from Los Angeles and San Francisco to the passenger ports of

the world. The vessels are new, built to the highest standards. Accommodations are the finest obtainable and provide the limit of home-like comfort.

Investigate this service. Complete information furnished by any local railroad, Dollar Steamship or Tourist Agency. Stop-over privileges and schedules arranged to suit any itinerary.

## SEVEN SISTER SHIPS

*President Polk  
President Hayes  
President Adams  
President Monroe  
President Garfield  
President Harrison  
President Van Buren*

### Sailings Every Fourteen Days Between
